

FILTER AND NETWORK TECHNOLOGY

Product : Video Isolation Transformer, Analogue, Fire-safe housing

Model No. : LVIT03

Overview

This heavy-duty model contains the same circuitry as the LVIT01, but is built in a metal 'fire-safe' housing, for such applications as public transport, military and marine environments. The outer casing is made of die-cast aluminium and the overall construction has increased NVH protection. Particular attention is given to minimising fumes under catastrophic fire conditions. The enclosure is diecast aluminium alloy, finished in black, textured, polyester-powder paint. All coating to circuit boards; transformer; and internal components is non-fuming.

Features

Breakdown voltage: Greater than 100V. Dimensions: 117 x 94 x 34 (l x w x h)mm excluding mounting flanges, 148mm length including flanges. Weight: 360g. Temperature range: - 0 to +50 degrees C, operating; -20 to +70 degrees C, storage.
